

# RoadWallet

## Road Wallet – real-time on-road cost control

Introducing **Road Wallet**, our exclusive **online** function to help you **plan, manage, administer** and **pay** for your driver on-road **spending**!

- Puts you in **full control** of where, when and how much **your driver** can spend **on-road**, removing the need to allocate **cash** or **EFT** travelling allowances.
- Also includes **REAL-TIME** transaction reporting on **all driver spending**.

## Manage driver spending in detail

Road Wallet is the first **management software** that provides **transport operators** with the functionality to manage **driver on-road spending** in detail – effectively and seamlessly. Road Wallet is incorporated into TFN's **On-road Refuel Management Software**.

**Manage your driver spend  
in detail!**

## Functions include:

- Set up a driver account with spending rules, spend items and limits (to include food, laundry, sanitary services, parking, etc).
- Select and set up suppliers where drivers can transact and spend allowances.
- No more need to EFT, make cash payments or reimburse allowances to drivers.
- If cash is required, eWallet is integrated into the software – no need for an FNB account.
- Manage driver spending against driver account rules and limits for spending per day/period.
- Provide a financial budget for your driver/s on-road spending over any length of time.
- Driver spending through the TFN Supplier Network (over 110+ sites nationally).
- Discount on driver spending at selected TFN suppliers.
- All driver spend details are immediately available on the Customer Dashboard.
- Comprehensive transaction reporting on all driver spending (invoice included).
- Road Wallet is included in the monthly fee for our On-road Fuel Management software.
